VOLUME 15 1985

SUBJECT INDEX

Acetylcholine
  aspartate, 39
  cold block, 123
  colonic temperature, 123
  epilepsy, 39
  gamma-aminobutyric acid, 39
  glutamate, 39
  hamsters, 123
  hippocampus, 39
  5-HT, 123
AChE fiber growth, 13
  astroglial cells
  hippocampal fimbria transection
  peripheral nerve homogenate implant
ACTH, 267
  cytoskeletal proteins
  neurotrophic peptides
  protein synthesis
  regeneration
Acute-phase reaction, 603
  body temperature
  glycoprotein response
  guinea pigs
Afferent fibers, 563
  mammary nerve
  milk ejection reflex
Aggression, 353
  cats
  motor impairment
  neuroleptic drugs
Aminergic system, 443
  fever
  immunoadjuvant activity
  muramyl dipeptide
Amphetamine, 385
  anorexia
  dopamine receptors
Analgesia, 299
  immunocytochemistry
  monosodium glutamate
Anatomical tracing, 129
  olfactory system
  transneuronal transport
  wheat germ agglutinin-horseradish peroxidase
Androgens
  lateral hypothalamic neuronal activity, 293
  medial forebrain bundle, 547
  microiontophoresis, 293
  pressure ejection, 547
Angiotensin II
  atrial natriuretic factor, 523
  dehydration, 99
  drinking, 99, 523
  glucose metabolism, 99
  immunohistochemistry, 79
  inhibition of drinking, 523
  neuroendocrine regulation, 65
  neurohumoral integration, 65
  subfornical organ, 65, 79, 99
Anorexia
  amphetamine, 385
  appetite, 397
  benzodiazepine receptors, 397
  dopamine receptors, 385
  eating, 371
  palatable food consumption, 397
  satiety, 371
Anorexic agent, 29
  guinea pigs
  intracellular recording
  mazindol
  ventromedial hypothalamus
Anterior hypothalamus, 651
  hypertension, salt-induced
  lesions, PVN-SCN
Antidromic discharge, 579
  meso-accumbens neurons
  ventral tegmental area
Antipyretics, 459
  endotoxin
  fever
  thermosensitive neurons
Antiserum, 19
  damaged CNS
  growth of axons
  lesions
Apparatus
  amplifier, 533
  Apple, IIe, 279
  micropipette tip, 351
  mounting jig, 351
  solenoid-controlled valve, 669
  x-y plotter, 533
Appetite, 397
  anorexia
  benzodiazepine receptors
  palatable food consumption
Apple IIe, 279
  BASIC language
  randomization
Arginine vasopressin, 209
  fever
  rabbits
  suppression
Aspartate, 39
  acetylcholine
  epilepsy
  gamma-aminobutyric acid
  glutamate
  hippocampus
Astroglial cells, 13
  AChE fiber growth
  hippocampal fimbria transection
  peripheral nerve homogenate implant
Atrial natriuretic factor, 523
  angiotensin II
  drinking
  inhibition of drinking
Auditory evoked potentials, 453
  sheep
Auditory responses, 677
  bats
  deoxy glucose autoradiography
Autoradiography, 473
  central nervous system
  glycine receptor
  [^{3}H]strychnine
AV3V, 595
  body fluid homeostasis
  subfornical organ
BASIC language, 279
  Apple IIe
  randomization
Bats, 677
  auditory responses
  deoxyglucose autoradiography
Benzodiazepine receptors, 397
  anorexia
  appetite
  palatable food consumption
Blood-brain barrier, 287
  dementia
  lipophilicity
  peptides
  permeability
Body fluid homeostasis, 595
  AV3V
  subfornical organ
Body temperature
  acute-phase reaction, 603
  glycoprotein response, 603
  guinea pigs, 603
  medial preoptic norepinephrine, 447
  sleep-wakefulness, 447
Brain
  anterior-preoptic area of hypothalamus, 123
  anteromedial hypothalamus, 651
  basal forebrain, 307
  brainstem, 117, 229
  caudate nucleus, 569
  central nervous system, 473
  cerebral cortex, 197
  dentate gyrus, 111, 629
  l-deprenyl, 183
  dorsal motor nucleus of the vagus, 5
  dorsal mylencephalon, 487
  dorsal raphe nuclei, 229
  Edinger-Westphal nucleus, 329
  hindbrain, 519
  hippocampus, 13, 39, 111, 215, 249, 273
  hypothalamic ventromedial nucleus, 509
  hypothalamus, 83, 149, 167, 293, 459
  ipsilateral nucleus basalis of Meynert, 307
  lateral hypothalamic-medial forebrain bundle (LHA-MFB), 547
  lateral hypothalamus, 33, 79, 183, 665
  locus coeruleus, 665
  medial basal hypothalamus, 299
  medial forebrain bundle, 293, 635
  medial preoptic area, 447
  median eminence, 657
  median preoptic nucleus, 79
  median raphe nuclei, 229
  medulla oblongata, 5
  meso-accumbens neurons, 579
  nucleus ambiguus, 5
  nucleus raphe dorsalis, 335
  olfactory cortex, 237
  parabrachial nucleus, 673
  parafascicular area, 257
  paraventricular nucleus, 79, 149, 651
  parietal cortex, 307
  perifornical, 635

pons medulla, 117
posterior hypothalamic, 635
prefrontal cortex, 225
raphe nucleus, 107
reticular nuclei, 437
solitary complex, 487
striatum, 183, 515
subfornical organ, 65, 71, 79, 83, 87, 99
substantia nigra, 515, 553, 569
subzona incerta, 635
suprachiasmatic nuclei, 149, 347, 465
thalamus, 437
ventral lateral geniculate nucleus, 465
ventral tegmental area, 537, 579
ventromedial hypothalamus, 1,29
ventromedial thalamus, 553
ventro-postero-medial, 437
Brainstem norepinephrine, 117
monosodium glutamate
neurochemistry
opiomelanocortin

CA1 cells, 273
hippocampus
opossums
synaptic plasticity
CA1 region, 249
hippocampal slice
long-term potentiation
Calcium, 107
in vitro studies
raphe nucleus
serotonin
Capsaicin, 191
galanin
immunocytochemistry
sensory ganglia
sensory neurons
Cardiac output, 321
cerebrovascular circulation
intracranial pressure
vasodilation
Cats
aggression, 353
clonidine, 329
dogs, 329
Edinger-Westphal nucleus, 329
morphine, 329
motor impairment, 353
neuroleptic drugs, 353
normorphine, 329
pupillary, 329
sleep, 437
thalamus, 437
unit activity, 437
vagal stimulation, 437
Cat skin, 529
cold stimulation
mechanothermal nociceptors
threshold
Central nervous system
autoradiography, 473
cholecystokinin-8, 167
glycine receptor, 473
immunohistochemistry, 167
[^{3}H] strychnine, 473
turtles, 167
Cerebral cortex, 197
endogenous release
transmitter interactions
Cerebrospinal fluid, 315
fever
intracranial pressures
pyrogen
Cerebrovascular circulation, 321
cardiac output
intracranial pressure
vasodilation
Charting system, 533
electronic photograph
x-y plotter
Chicks, 155
neuropeptides
retina
three dimensional analysis
Cholecystokinin-8, 167
central nervous system
immunohistochemistry
turtles
Cholinesterase, 5
medulla oblongata
muscarinic receptors
vagotomy
Ciradian rhythms
crayfish, 203
hamsters, 149
hypothalamic circuits, 149
lithium, 347
locomotor activity, 149, 347
photoperiodism, 149
pineal melatonin rhythms, 347
splitbrain, 203
symmetrical pacemakers, 203
vision, 203
Circling
dopamine utilization, 553
hyperactivity, 553
neurotensin, 537
Ventral tegmental area, 537
Clomipramine, 1
paradoxical sleep
push-pull superfusion
ventromedial hypothalamus
Clonidine, 329
cats
dogs
Edinger-Westphal nucleus
morphine
normorphine
pupillary
CNS development, 335
intraocular grafts
nucleus raphe dorsalis
serotonin
Cold block, 123
ACh
colonic temperature
hamsters
5-HT
Cold stimulation, 529
cat skin
mechanothermal nociceptors
threshold
Colonic temperature, 123
ACh
cold block
hamsters
5-HT
Corticotropin releasing factor, 519
hindbrain
spinal cord
Crayfish, 203
circadian rhythms
splitbrain
symmetrical pacemakers
vision
Cremaster motoneurons, 609
genitofemoral nerve
immunohistochemistry
scrotal thermoregulation
Crossed projections, 515
horseradish peroxidase
operant turning
striatum
substantia nigra
Current generators, 237
current-source-density
olfactory cortex
Current-source-density, 237
current generators
olfactory cortex
Cytoskeletal proteins, 267
ACTH
neurotrophic peptides
protein synthesis
regeneration

Damaged CNS, 19
antiserum
growth of axons
lesions
Dehydration, 99
angiotensin II
drinking
glucose metabolism
subfornical organ
Dementia, 287
blood-brain barrier
lipophilicity
peptides
permeability
Dentate gyrus, 111
electrophysiology
glucocorticoids
hippocampal development
Deoxyglucose autoradiography, 677
auditory responses
bats
2-Deoxy-D-glucose, 429
eating
ischymetric hypothesis
locomotor activity
metabolic rate
l-Deprenyl, 183
endogenous brain amines
β-phenylethylamine
reinforcement
self-stimulation
Dexamethasone, 587
drug interaction
naltrexone
oxytocin release
tail electroshock
vasopressin release
Diacylglycerol, 657
in vitro
LHRH secretion
phorbol esters
prostaglandins
Diet, 411
food choice
5-hydroxytryptamine
nutrient
Dogs, 329
cats
clonidine

Edinger-Westphal nucleus
morphine
normorphine
pupillary
Dopamine
electrophysiology, 221
neuronal activity, 665
norepinephrine, 665
olfactory tubercle, 665
substantia nigra, 221
unit activity, 221
voltammetry, 221
Dopamine receptors, 385
amphetamine
anorexia
Dopaminergic grafts, 543
haloperidol
neural grafts
Dopamine utilization, 553
circling
hyperactivity
Dorsal myelencephalon, 487
immunocytochemistry
monoaminoxidase inhibitors
Dorsal raphe nuclei, 229
immunohistochemistry
median raphe nuclei
tyrosine hydroxylase
Drinking
angiotensin II, 99, 523
atrial natriuretic factor, 523
dehydration, 99
glucose metabolism, 99
inhibition of drinking, 523
